ABOUT OUR COMPANY

Loop Consulting Group, is here to realize your vision. It implements what the clients imagine by solving and simplifying complex problems to help them build in accordance with engineering principles. As a multidisciplinary construction management consulting company, Loop provides service for various sectors and project types. Loop Consulting Group aims to provide excellence for investors, contractors, subcontractors, financial institutions, engineers, and architects by implementing the highest quality standards in consulting services in the construction sector.

We support our clients to overcome complex construction projects and to realize their project goals with sector awareness, practical business knowledge experience, and efficient use of technology.

Loop Consulting Group develops unique solutions tailored to each customer's specific needs in the management and supervision of construction projects, in the resolution of the disputes and the rights claims between the parties, judicial issues, and litigation processes, in training qualified and skilled technical staff in accordance with the needs of the sector and recruiting qualified technical staff and teams.

The professionals of Loop Consulting Group have a respected position in the sector thanks to their customer-focused and solution-oriented approach. Finally, Loop Consulting Group derives its strength from the references full of appreciation from its current and past employers.

OUR VALUES THAT MAKE US DIFFERENT

We aim to make a difference in each aspect.

As construction consultants, we provide information, analysis, and recommendations about the best practices to add value, and to improve our clients' projects and budget balances. Therefore, we realize the right practices that must be done within the framework of professionalism and ethical values, even though the management does not want to accept.

Planning and cost control is our priority.

Loop's construction consultants offer unique advantages to clients today on which the competition is challenging by well-defining the risks and thus ensuring the adoption of strong planning and a disciplined cost control system in the company culture.

We provide professional solutions for the claims about construction works.

Our consultants have professionally solved numerous construction claims in many international projects by using their experience in previous planning and cost control works and superior communication skills. Besides all this, our way of evaluating the findings and sharing them makes us different.

Loop Consulting Group and Sector Leaders.

You need to be at the forefront in the sector to be the catalyst for the change. Our consultants are leaders in their own sectors and guides other professionals for change and development.

With the awareness of the fact that the claims for a construction work create a sensitive relationship between the parties, Loop's experienced consultants provide constructive, reasonable, and professional solutions by observing the balances.

OUR TARGETS

Loop Consulting Group has adopted principles of integrity, honesty, and accountability as a base for all its operations and has built its decisions in accordance with the ethical values in this framework.

The culture and organization of our company are based on the principles of decision-making after in-depth research and the meticulous application of it. We add value to our clients in this way.

OUR TARGETS

Besides maintaining the enthusiasm to do a job, we have **endeavor and dedication to continuous improvement and to work.**

We are a unique team that has an open communication, works to create a great work environment that appreciates the contribution, and works to achieve the common goal.

LOOP'S CULTURE

Loop Consulting Group's Mission

1. **Partner clients** ; To provide high value-added and cost-effective services that enhance the performance of our partner clients and improve their current standards.
2. **Employees** ; To promote personal development in a continuous, encouraging, and rewarding working environment.
3. **Sector** ; To identify new tools, methods, and technologies and applications for the sector professionals to follow.
4. **Community** ; To work in accordance with the interests of the communities in the entire world which we have designated as our area of operation.
5. **Environment** ; To contribute to ethical decisions to protect the environment, which is the greatest heritage we will leave for the future generations, against adverse effects.

OUR VISION

To be a reputable and sought-after construction consultancy company committed to the highest standards by contributing to the development of the sector for the clients and the employees.

SOCIAL RESPONSIBILITY

Loop's construction consultants actively participate in various sectors, charitable organizations, and community events. In events organized by local or international aid organizations, they undertake various responsibilities in accordance with the sponsorship as a company or voluntary service as an individual.

IN THE SECTOR

Loop relies on its consultants' in-depth knowledge and the rigorous experience in the sector, diversified engineering, and up-to-date training infrastructure, and creative technological solutions to support implementing new or ongoing projects for the private sector and the public sector as well as the public-private partnership (PPP). **What makes the Loop Consulting Group is its unique technical consulting skill that provides effective team-oriented services. Our cooperation with key individuals and organizations in the sector enables us to support our clients on the issues of project and construction management.**
